# "The Vision For **Store-Of-Value** OnChain"

The First Value-Centric Layer 2 EVM Chain backed by Stablecoins & Immune to Market Fluctuations
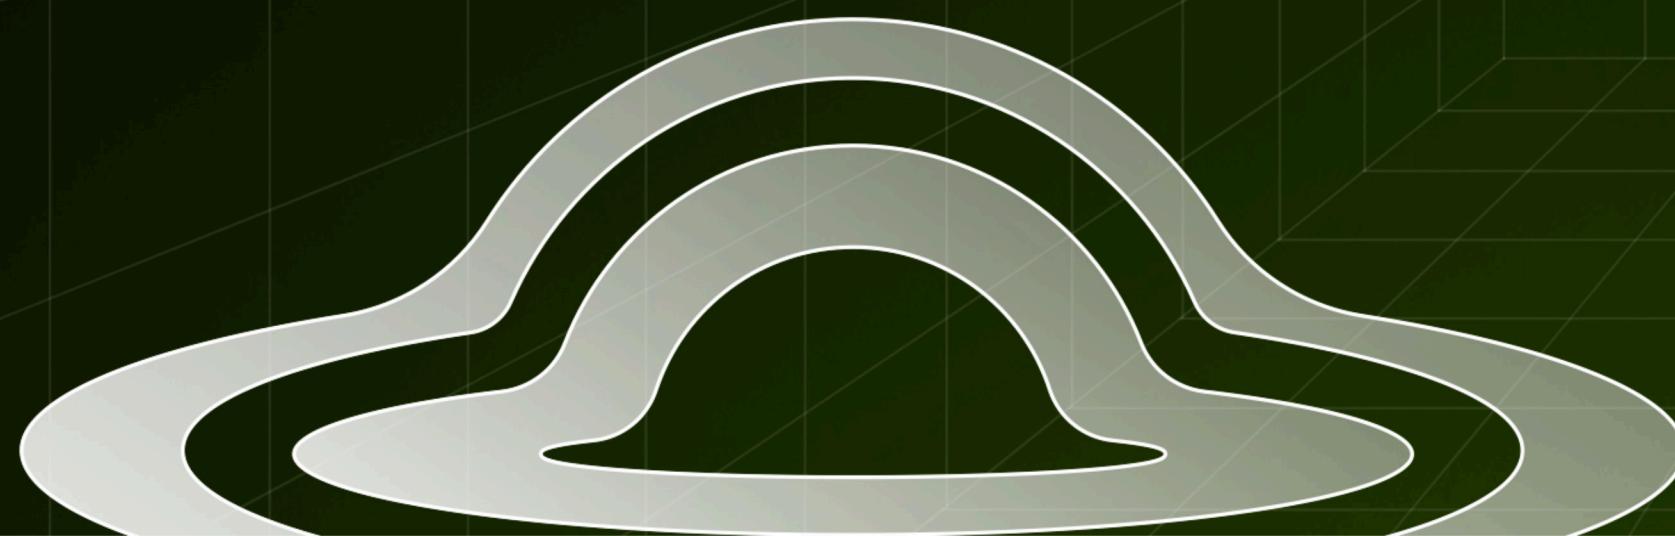

stable

Lets start from the **beginning**...
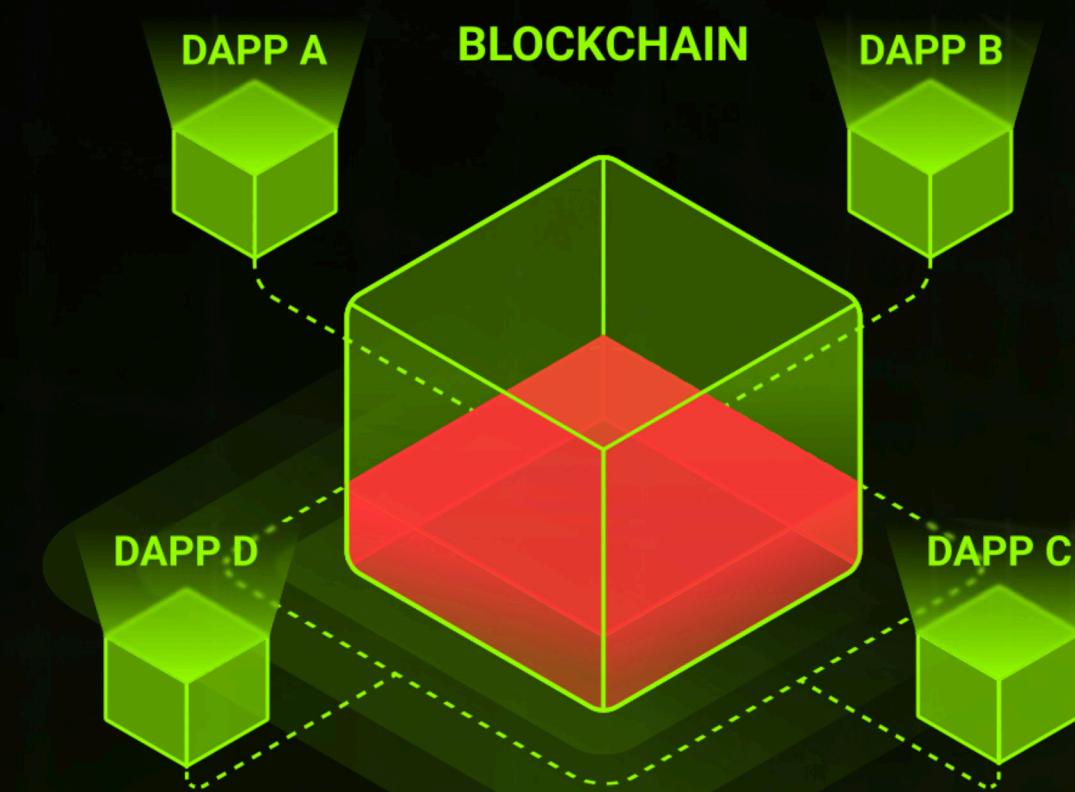

Provide a Secure Foundation for DApps and Web3 Products
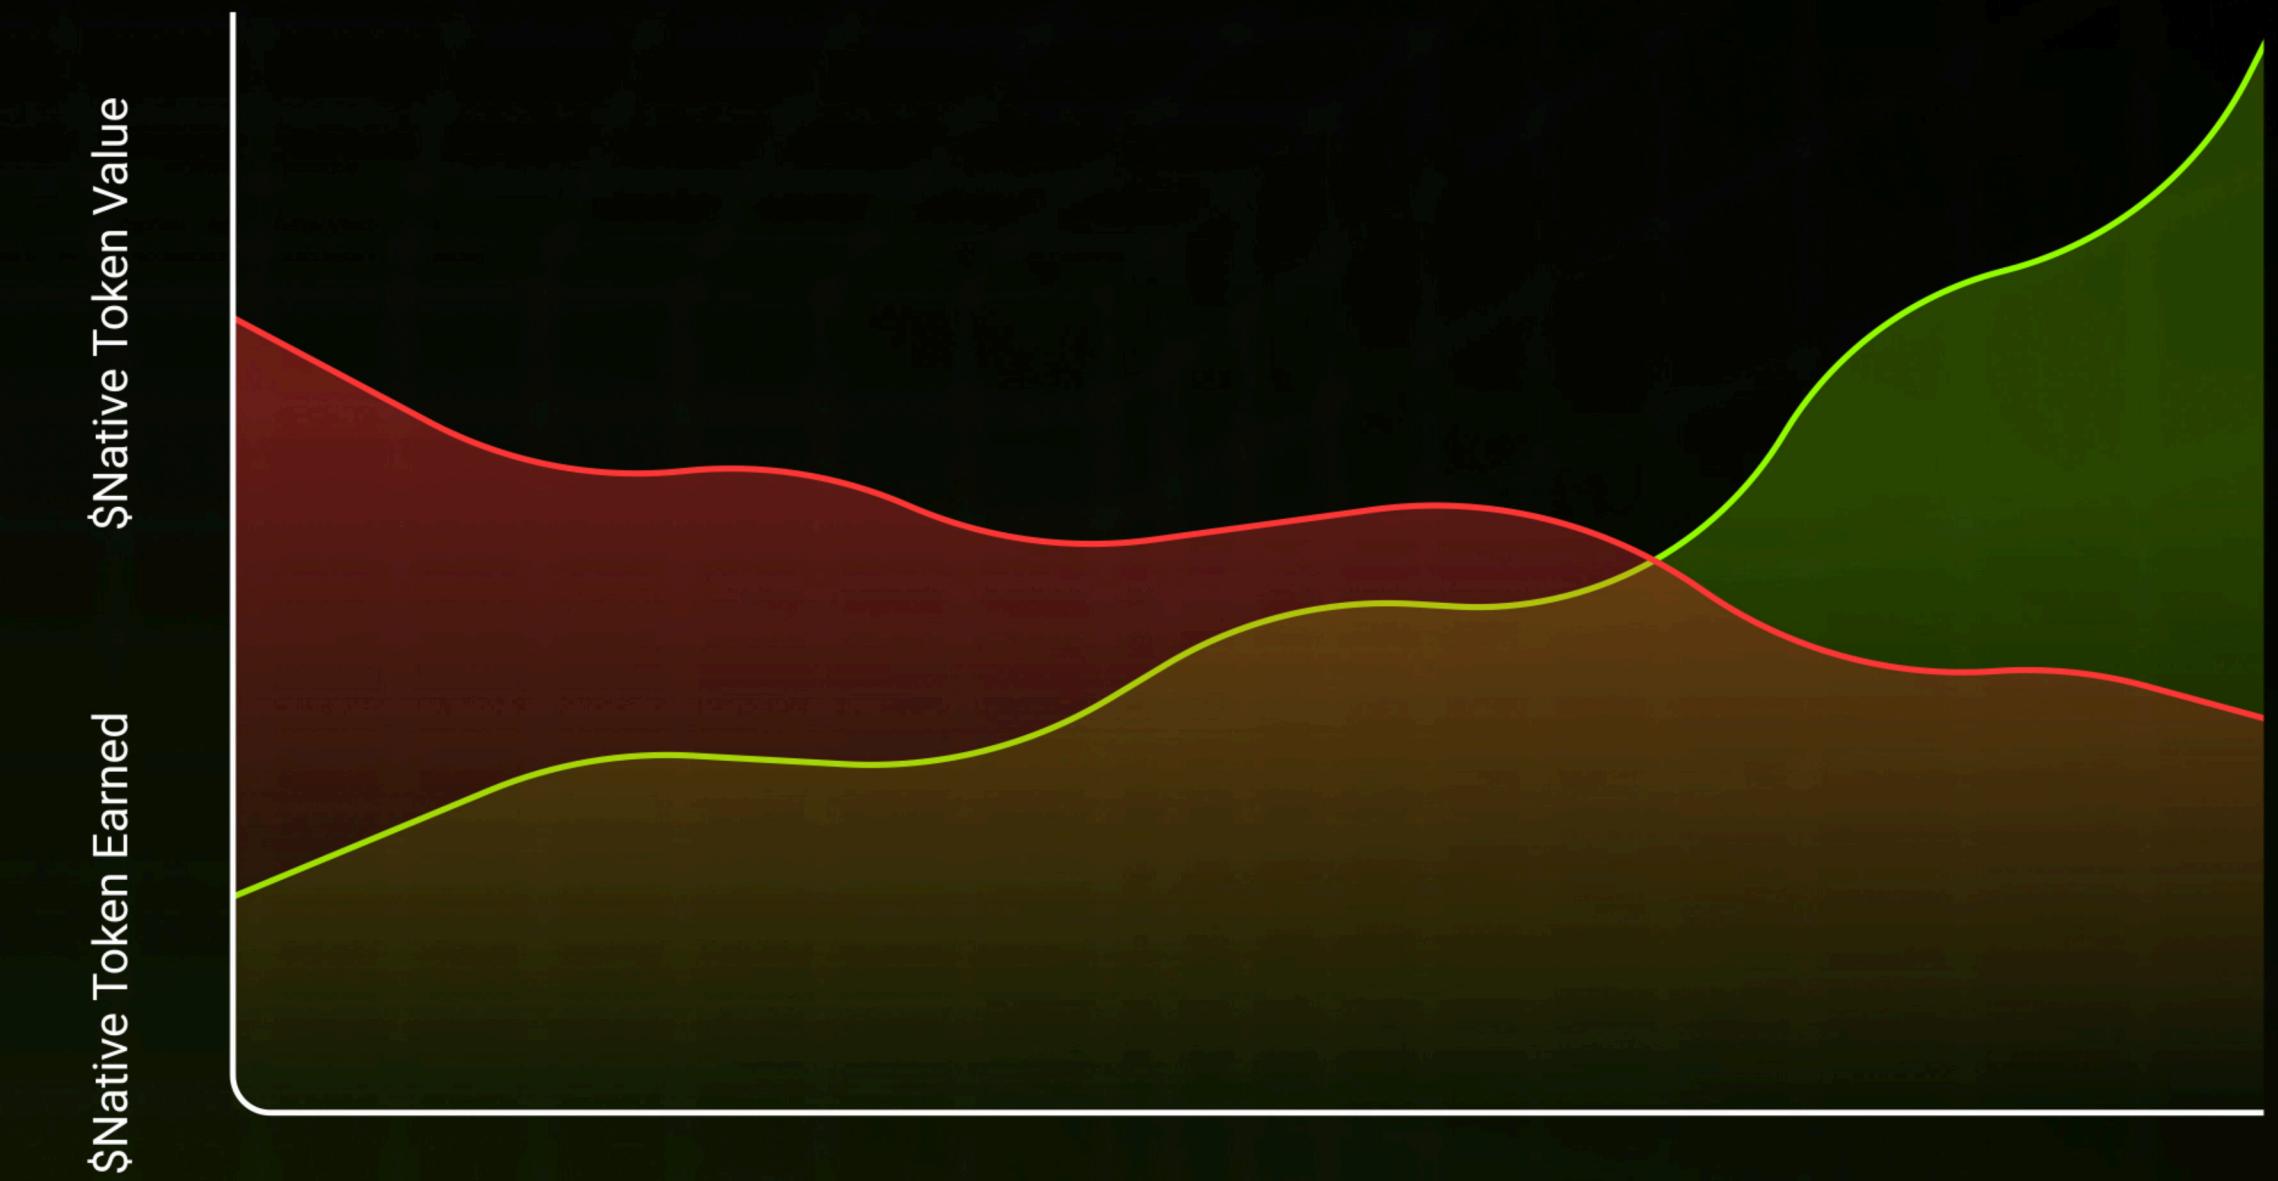

Enable Users to Store Value in Cryptocurrency

Loss of *value* in Blockchain

| 100 X Token | 1 ETH | *1 $ETH = $3,000* |

| X/ETH Pair | *1 $X = 0.01 ETH = $30* |

| ETH -25% ↓ | *1 $ETH = $2,250* |

| X/ETH Pair | *1 $X = 0.01 ETH = $22.5* |

That's Why
YOU
Need
StableChain
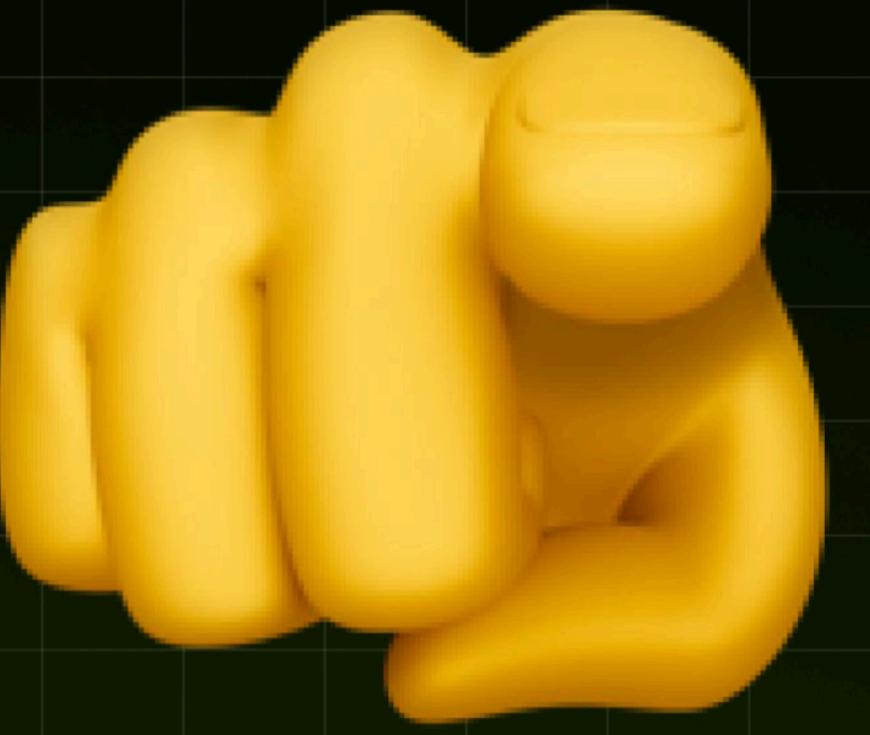

Stablechain's Unique Approach & Revenue Model

- USDT
- USDC
- DAI

- ETH
- stETH
- wETH
- rETH

Bridge Treasury

Receive (ETH) 1:1 of the bridged Value

Receive (SUSD) 1:1 of the bridged Value

8%-10% APY

Maker DAO/Eigen Layer

Yield

40% Dev Grants

50% Protocol

10% Early Investors

Carries out all of the chain's Activities

Negligible *FEES*

Gas *fees* in Stable Coin

Sequencer Fees
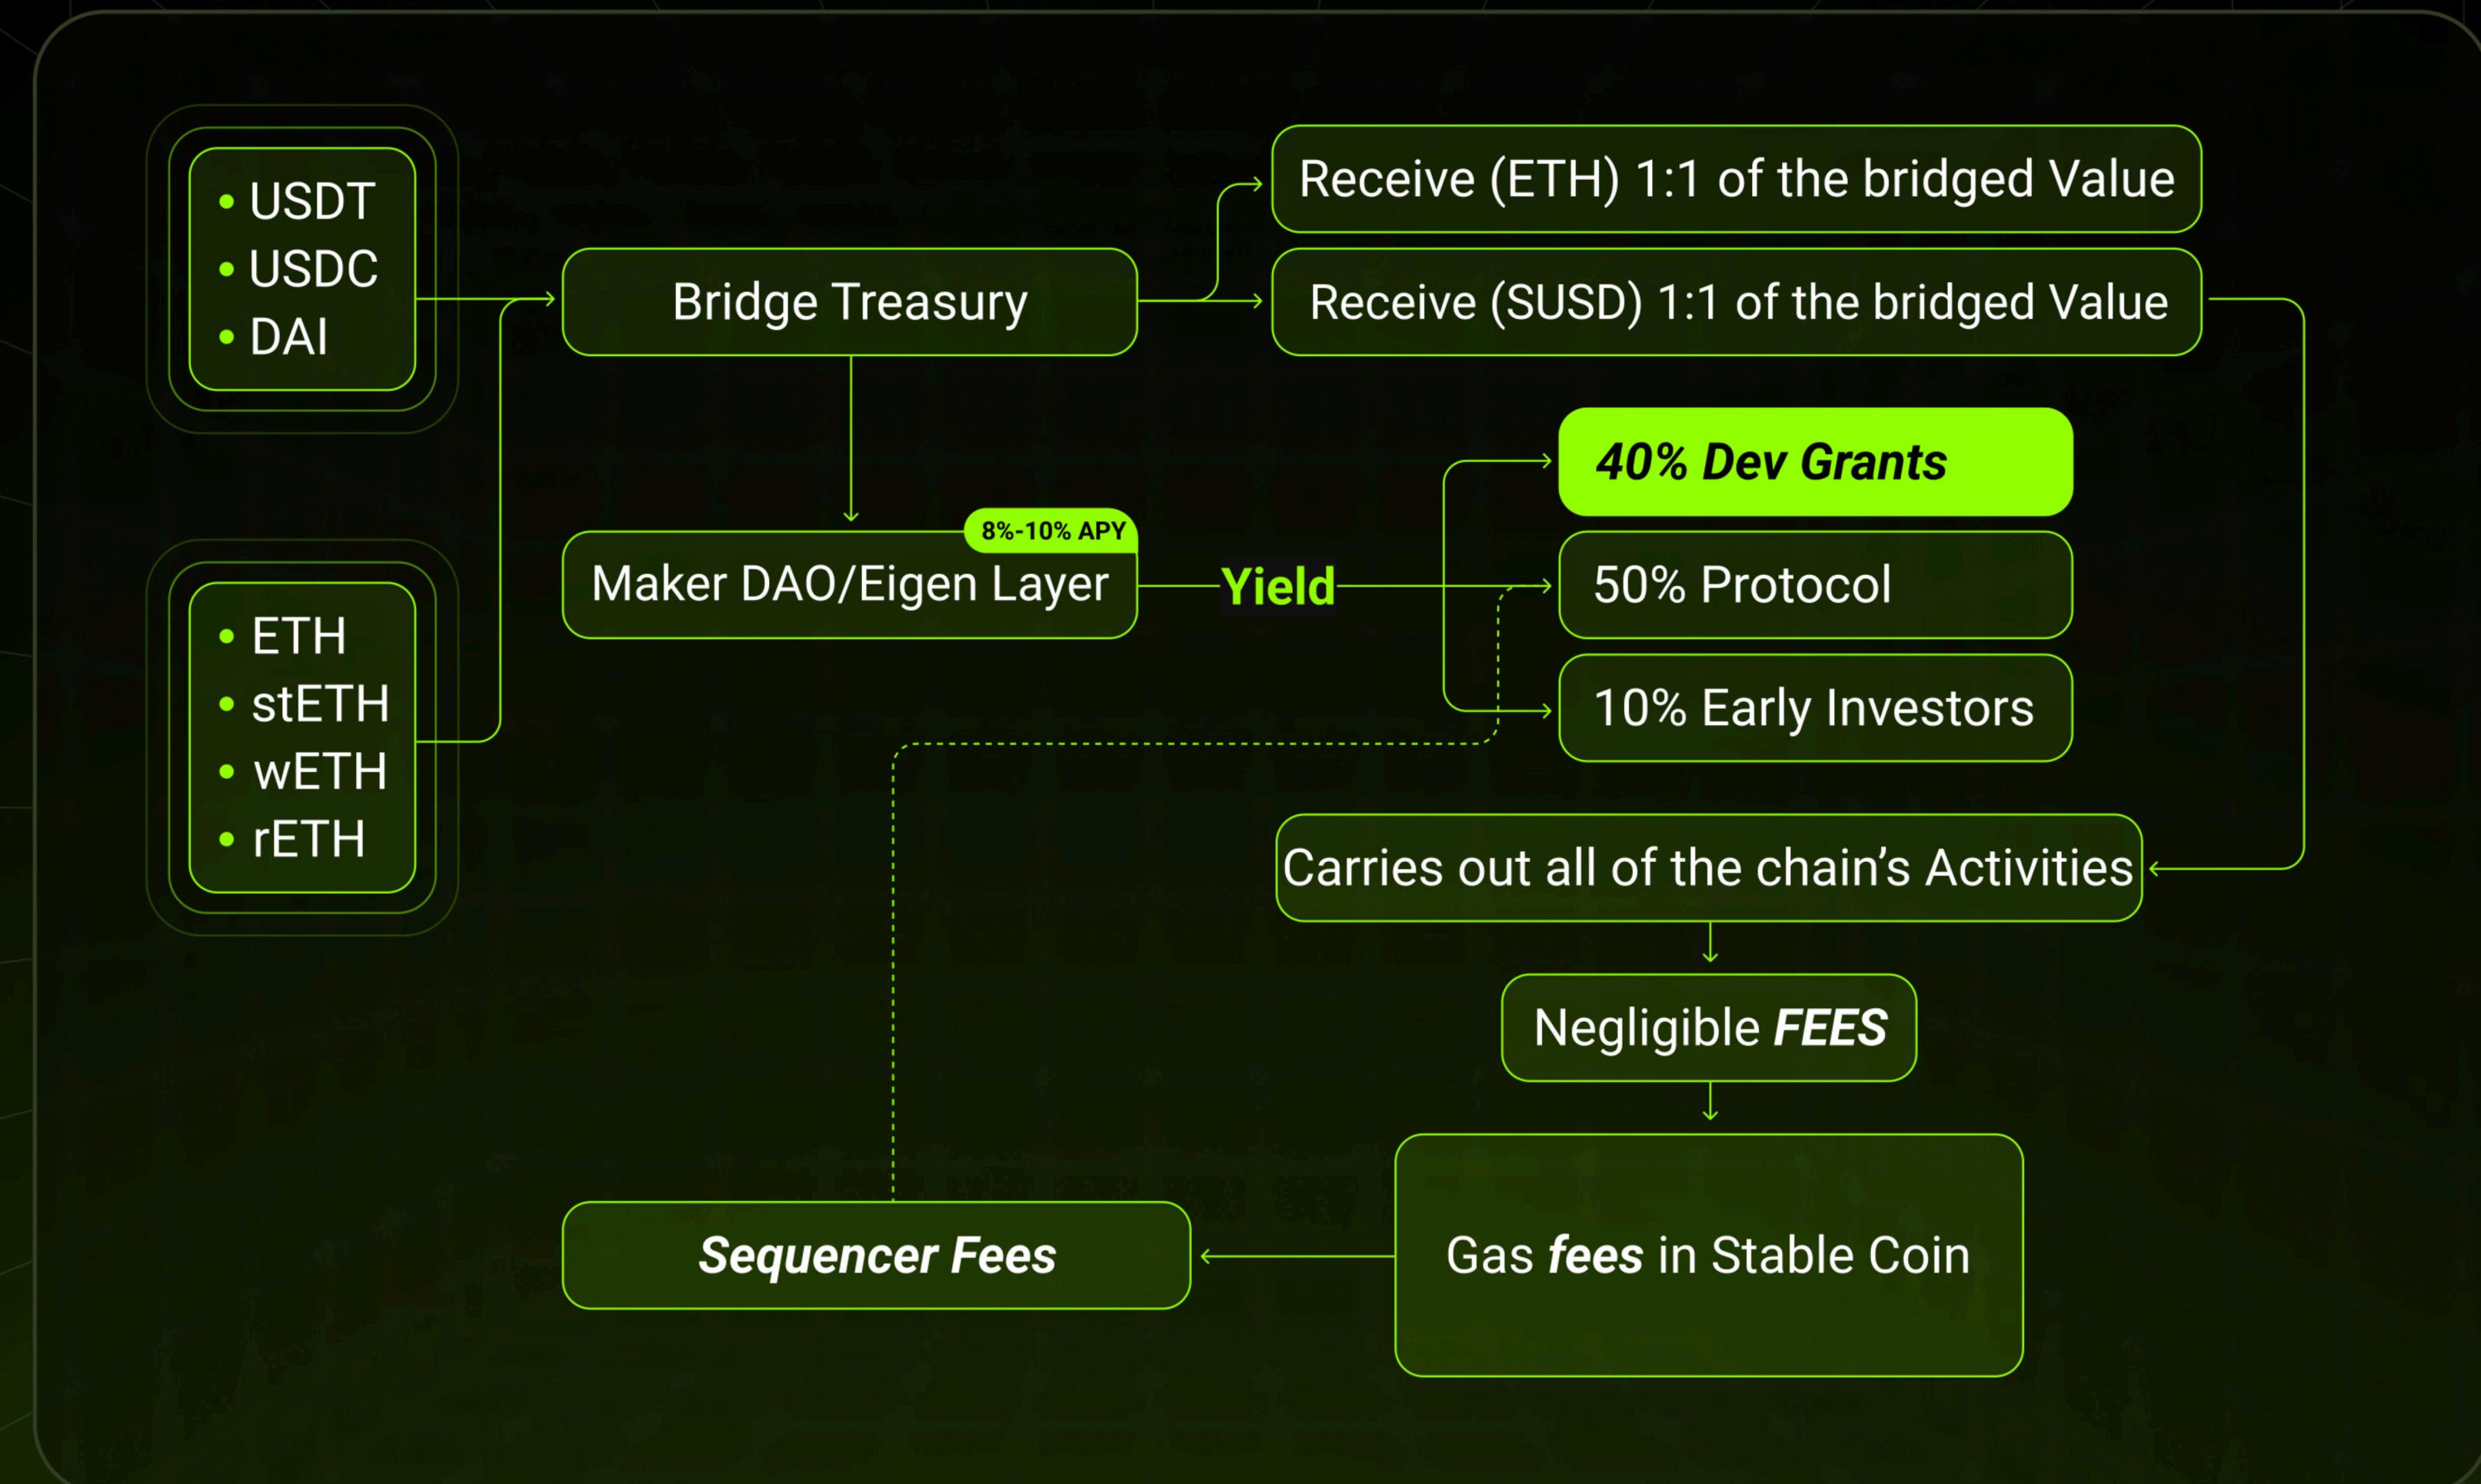

Network Artitecture

OP Stack	**Framework**
Ethereum	**Settlement Layer**
Eigen DA	**Data Availability**
Native Coin	**SUSD**

Scalability and Stability for DApps

Gas spent in stable coin

Hedge Against Market Volatility

Business-Ready Scalability
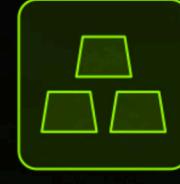

Store of Value for DApps

- Stable functional and financial operations
- Confidence for developers and users

Enhanced Payments for RWA

- Ease of Payments
- Seamless Integration

Scalable DApp Environment (developer friendly)

Optimized Infrastructure for RWA Trading

1:1

Stable Value Pegged to USD.

- Minimized Volatility
- Trust and Confidence

Store of value and Payment gateway
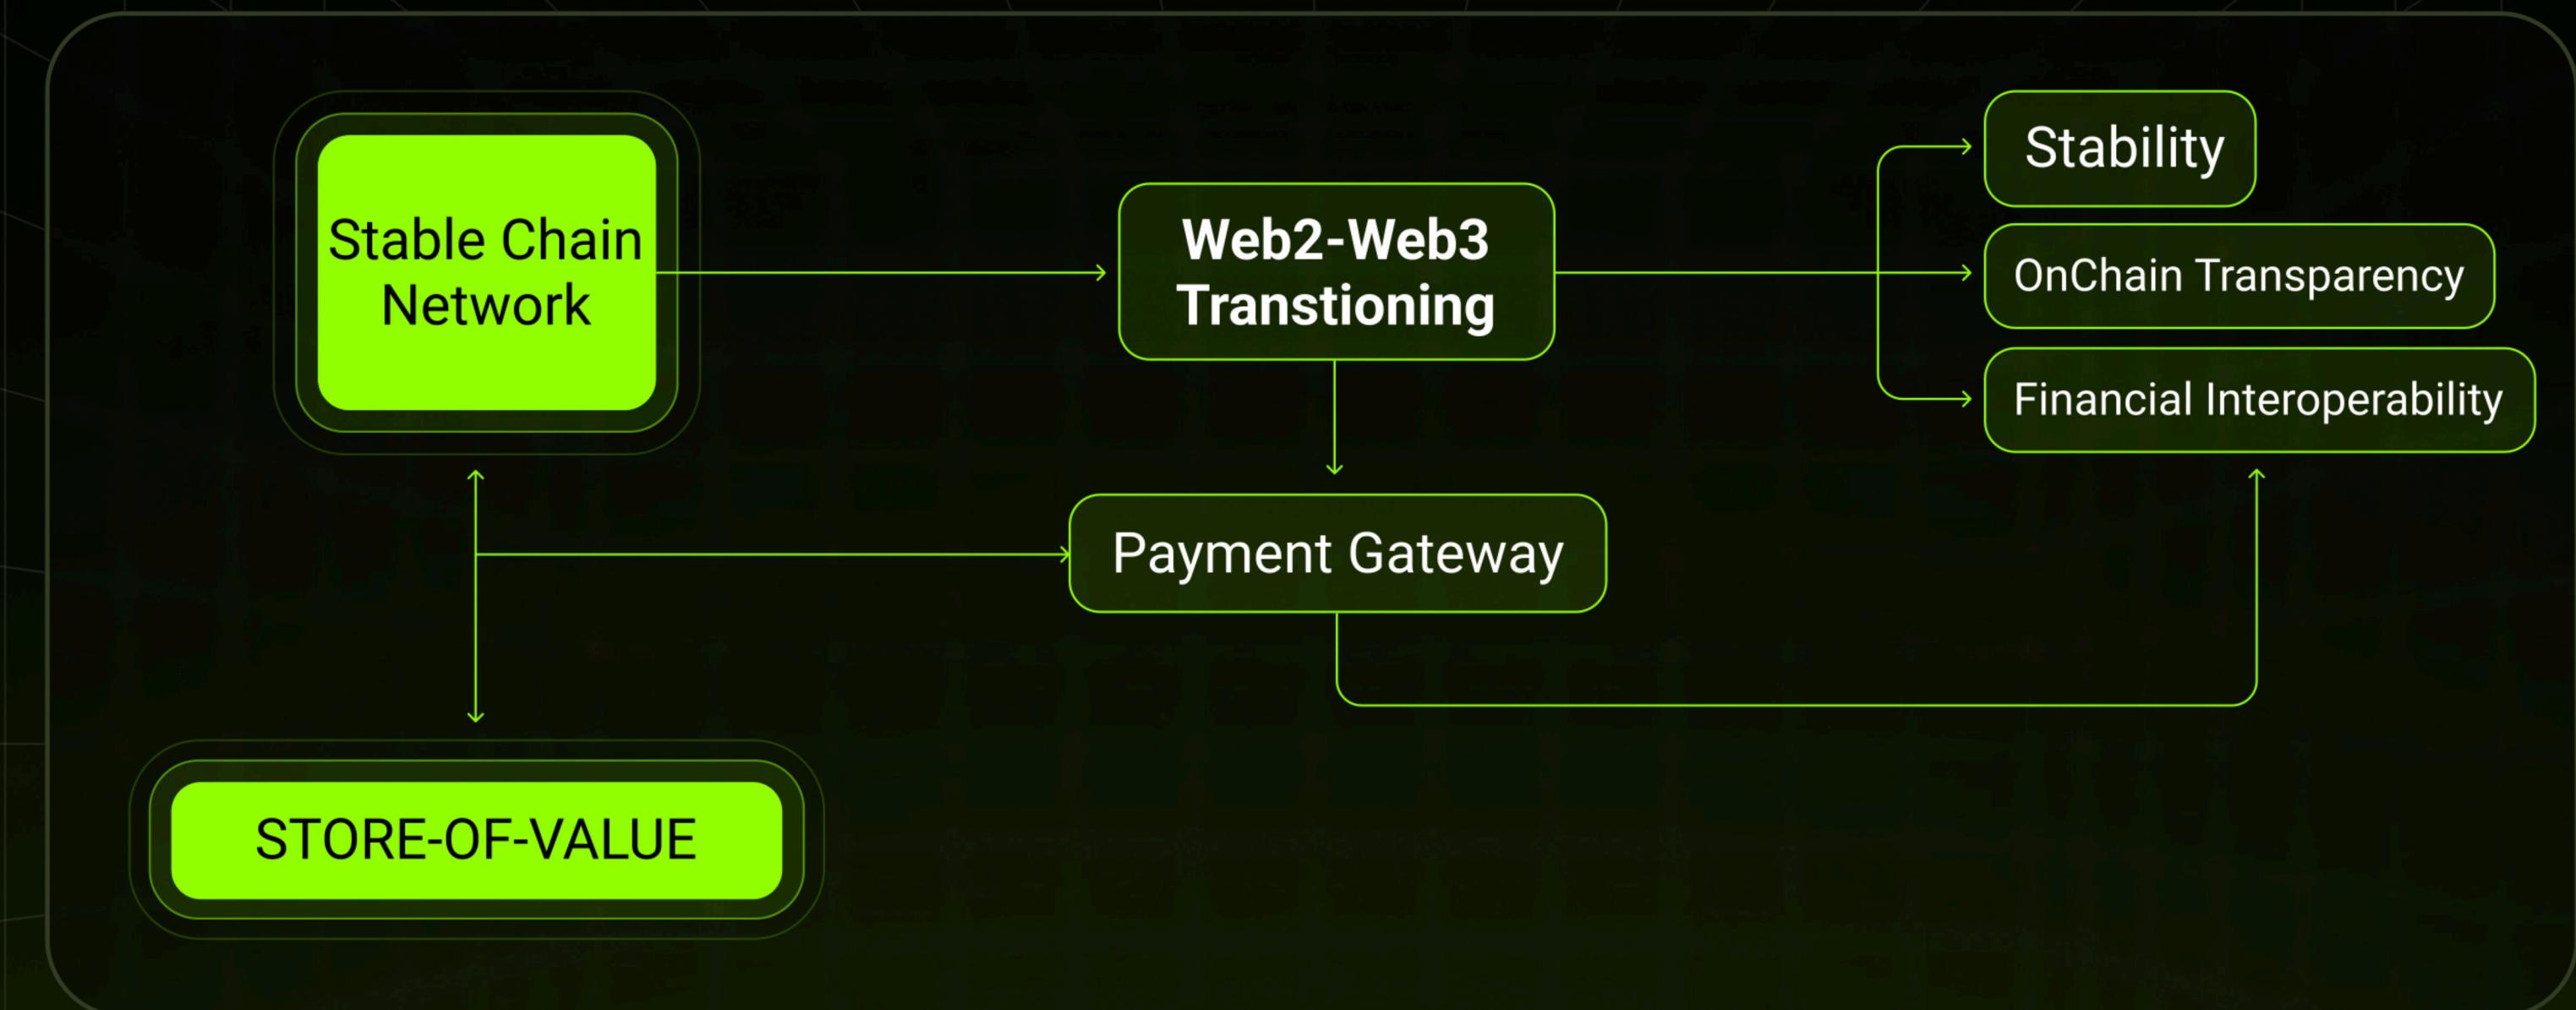

Benefits for the Crypto community.

Other Chains

ETH$_{(gas\ native)}$/X Token **LP**

X Token **buying pressure** ⬆

ETH **price dropping** ⬇
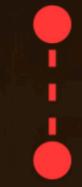

Loss of **VALUE** for X Token

Stable Chain

SUSD$_{(gas\ native)}$/X Token **LP**

SUSD = USD Pegged

X Token **buying pressure** ⬆

No **VALUE** loss, no **Liquidity** loss!
Doesn't need different coin for
gas/utility

(store of value)

Incongruity from the crypto market fluctuations

Stable Chain   Ethereum   Blast   Arbitrum
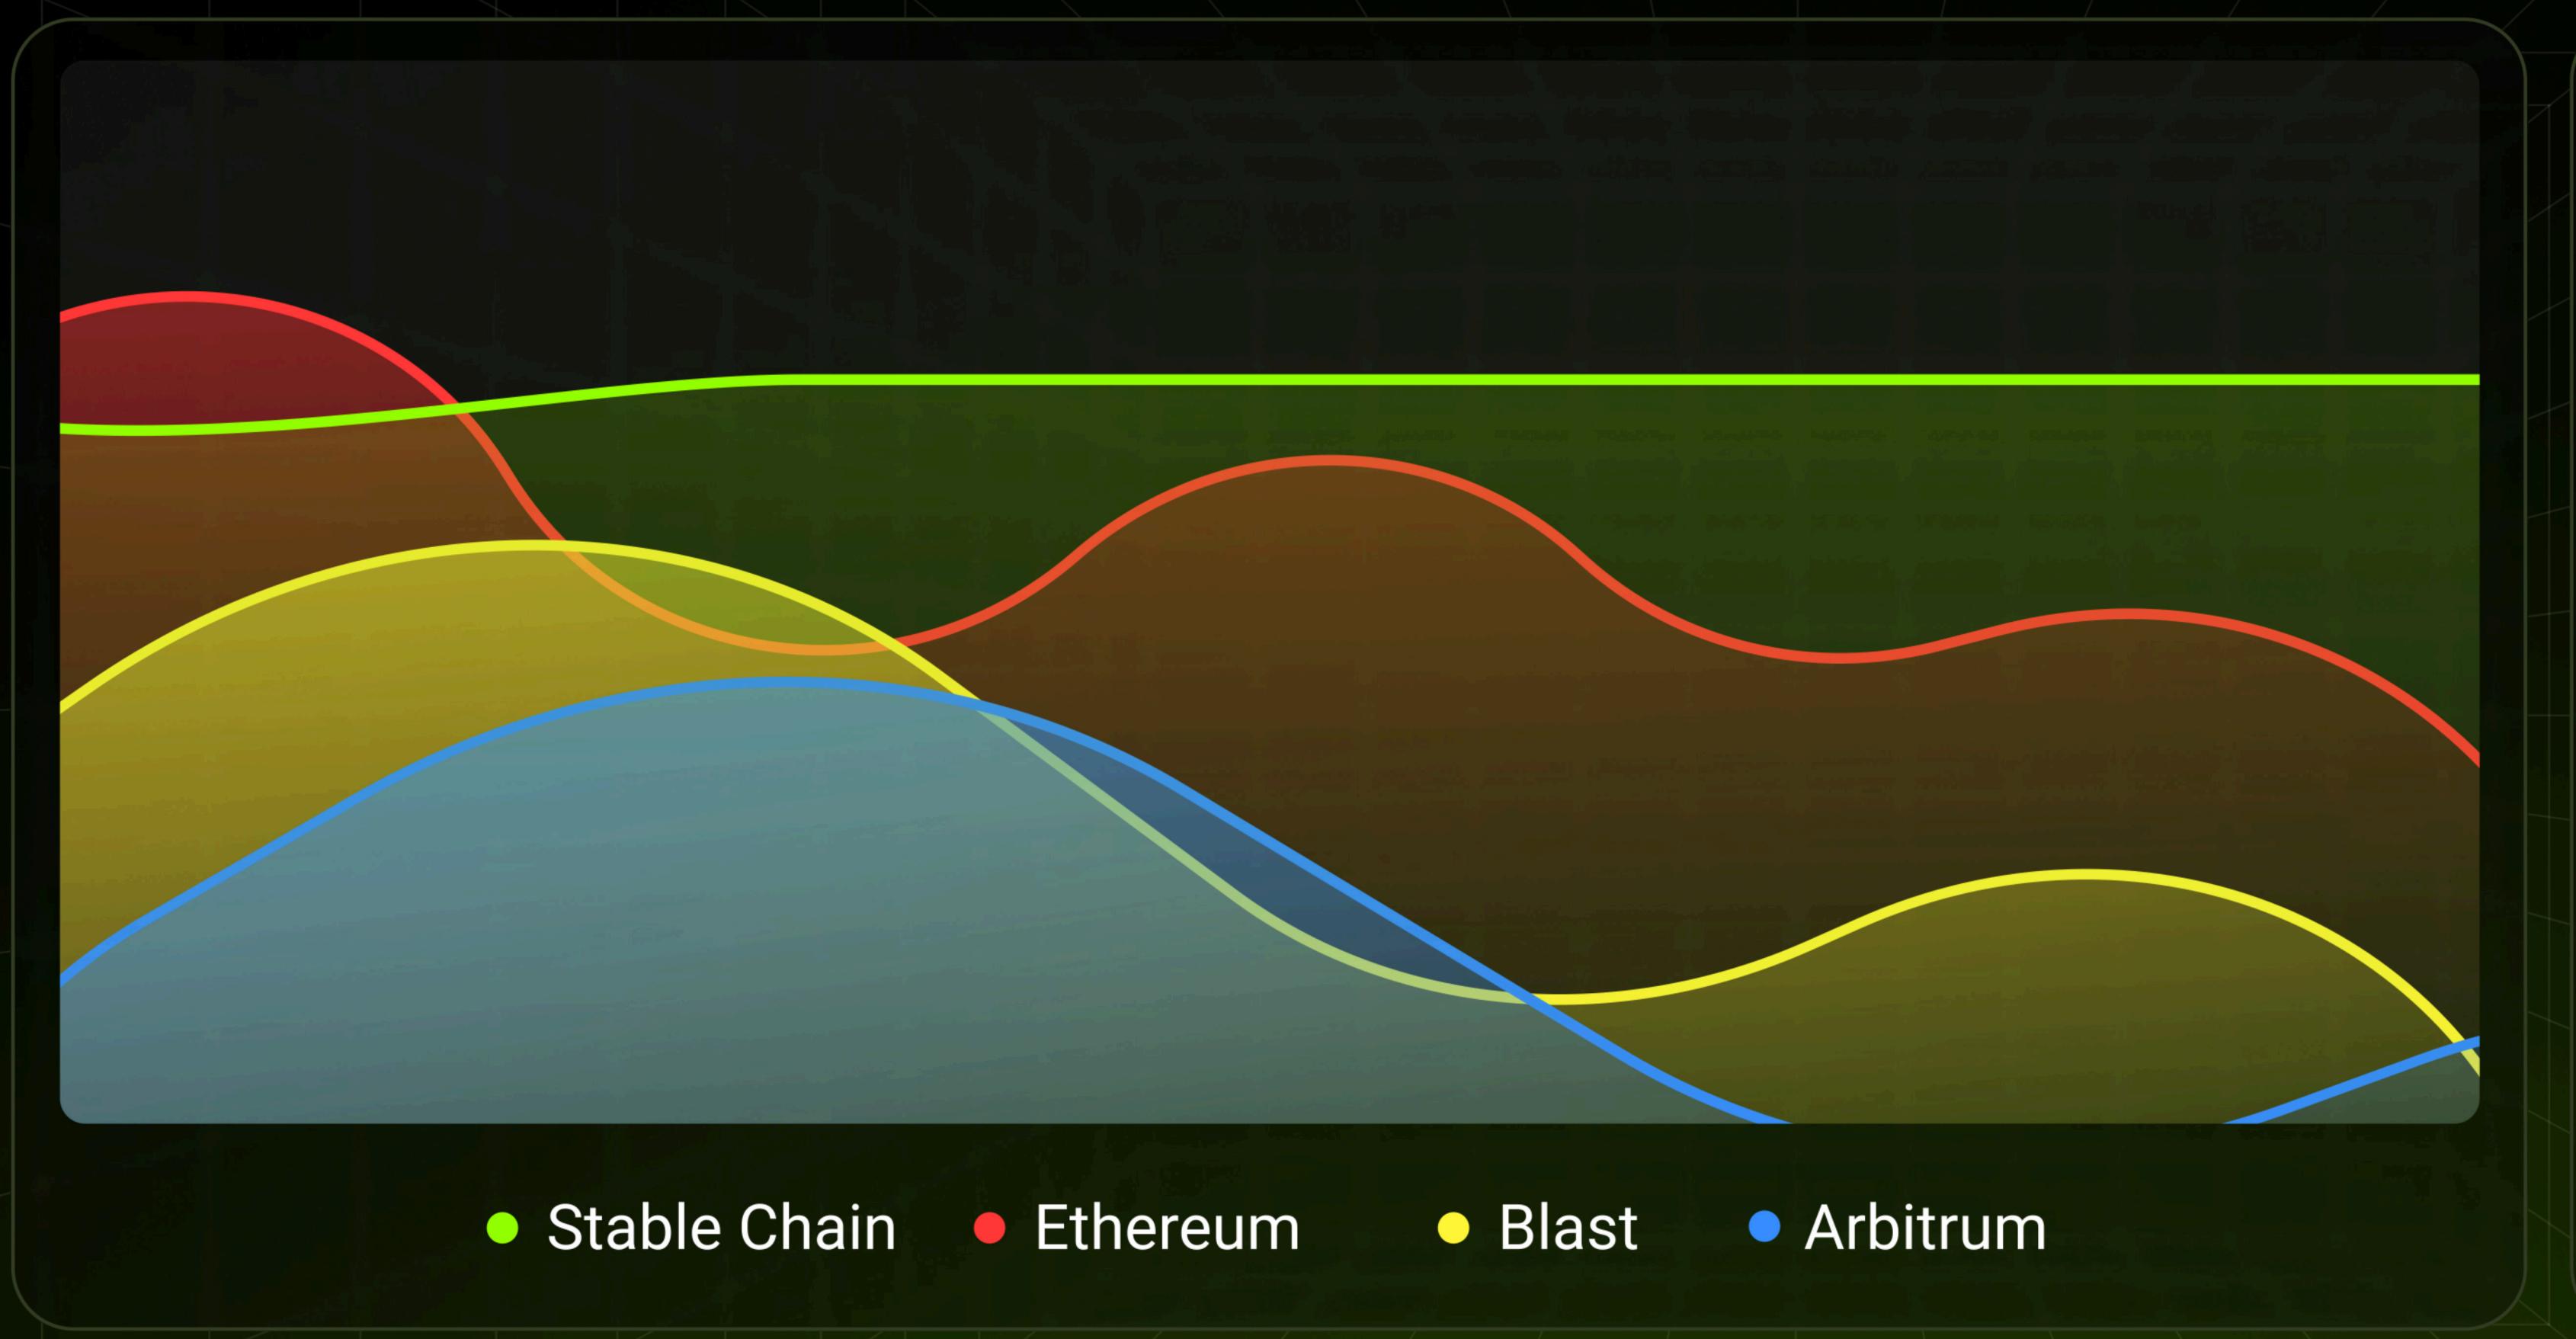

Only Stablechain is **detached from Market Volatility** due to using stable coin as the native coin, Reducing the risk for users and providing a Sustainable Growth for DApp implementation

Revenue model

**Stable Chain EVM**

More DAPPS joining ecosystem

User using products & generate traffic

High transaction volume

SequencerFees

8%-10% APY

Higher Yield from bridged assets

50% Company Revenue

40% Dev Revenue Sharing

10% Early Investor
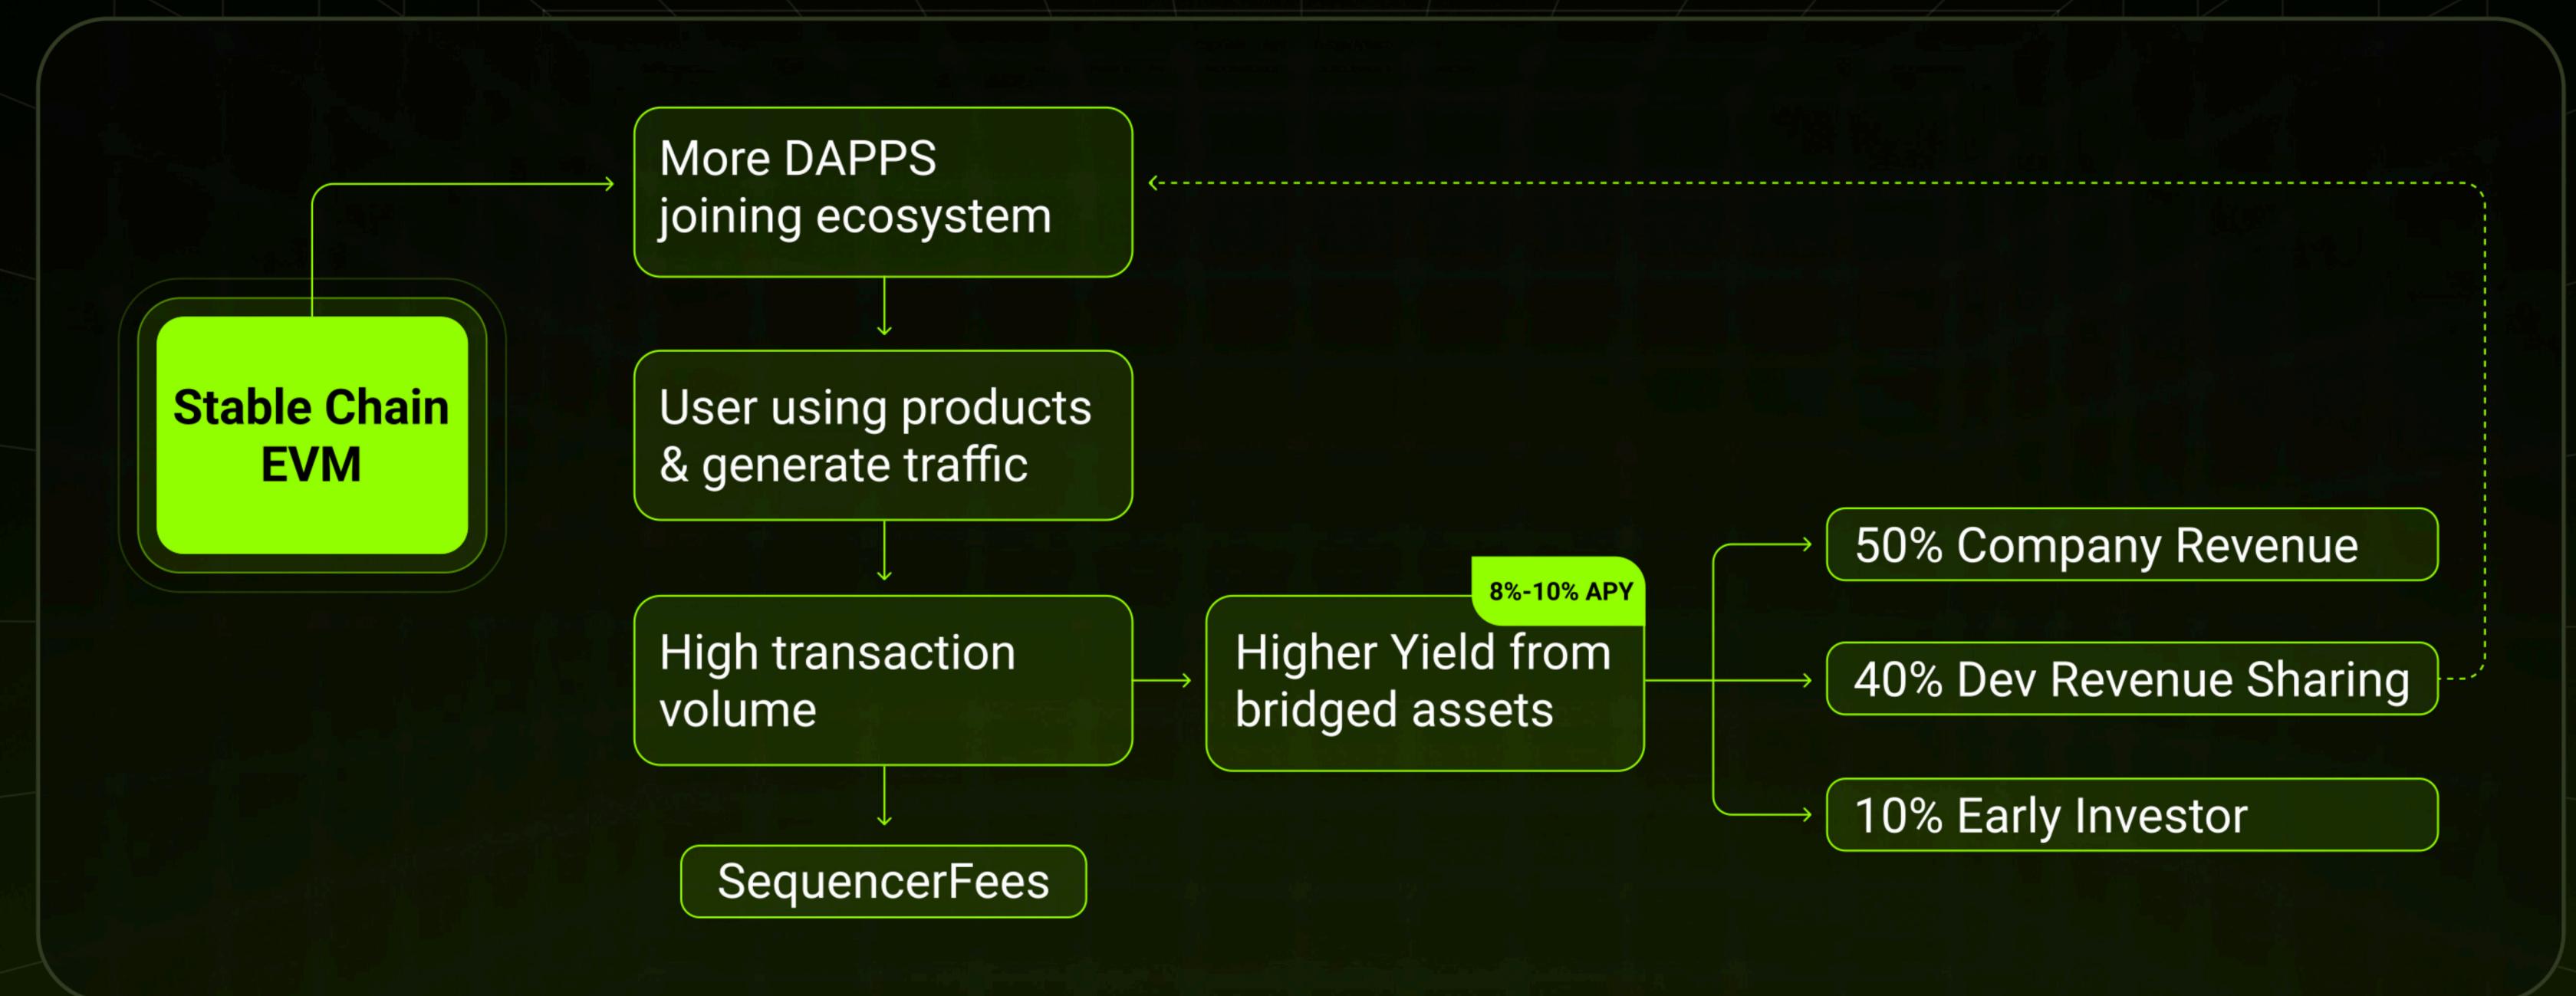

Market
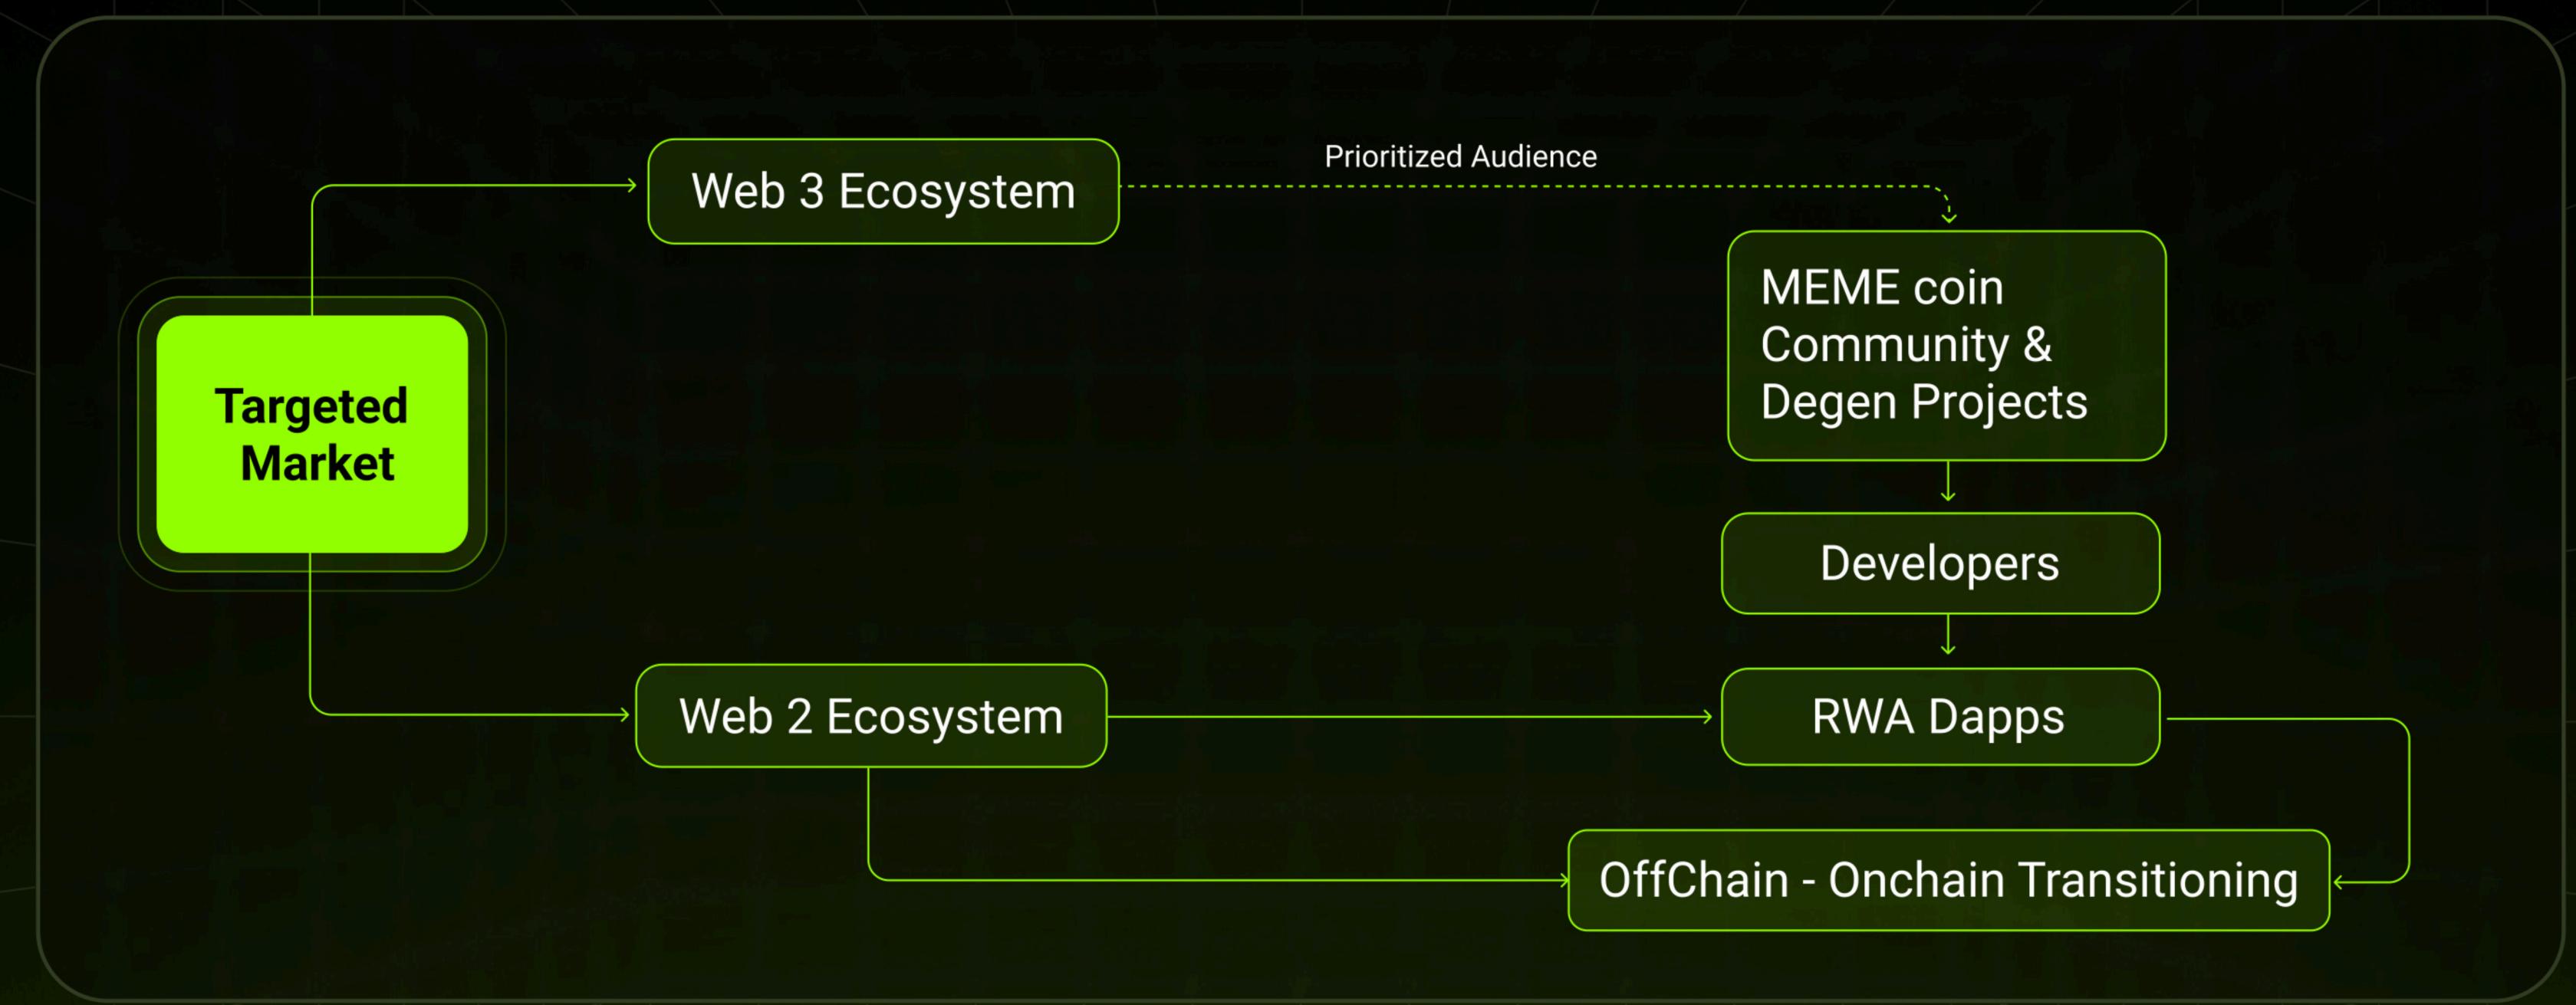

Funding Utilization

Pre-seed Target $2,000,000

Blockchain Infrastructure

Hiring team and expanding the network

Team salary

Roadmap

2024
- Sep
- Oct — Official Marketing Starts With GALXE Campaign | Partnership | Onboard DAPPS
- Nov
- Dec — Testnet Launch (along with Developer campaign)

2025
- Jan
- Feb — Testnet Launch Events
- Mar
- Apr — Mainnet Launch
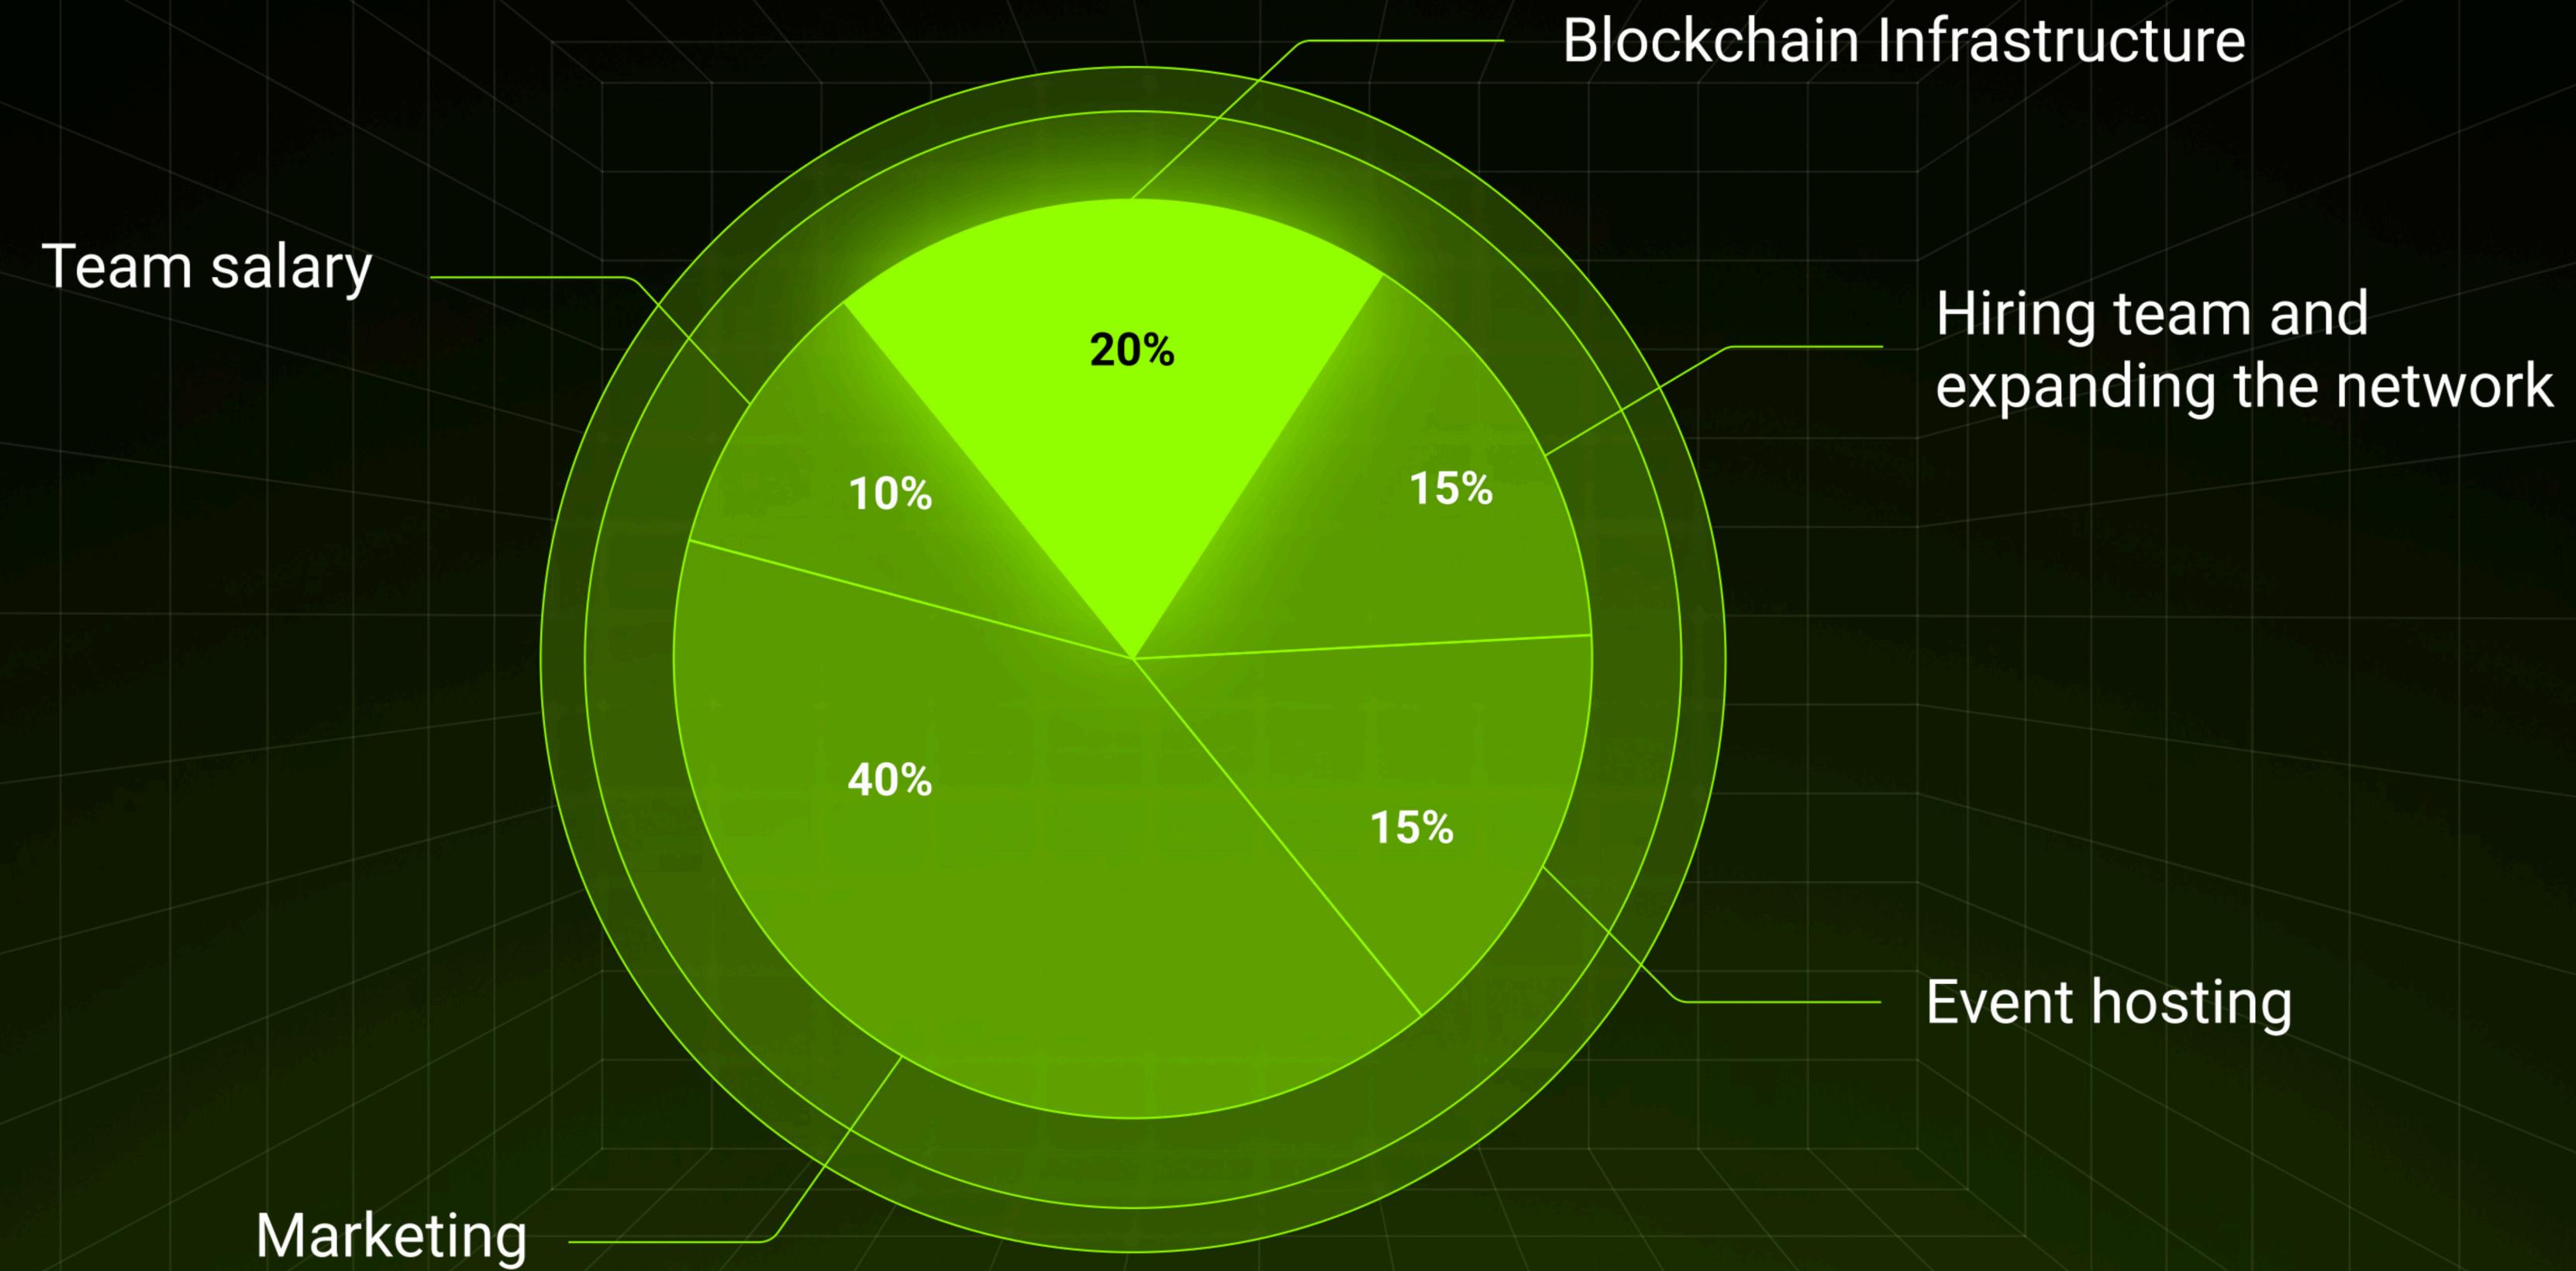

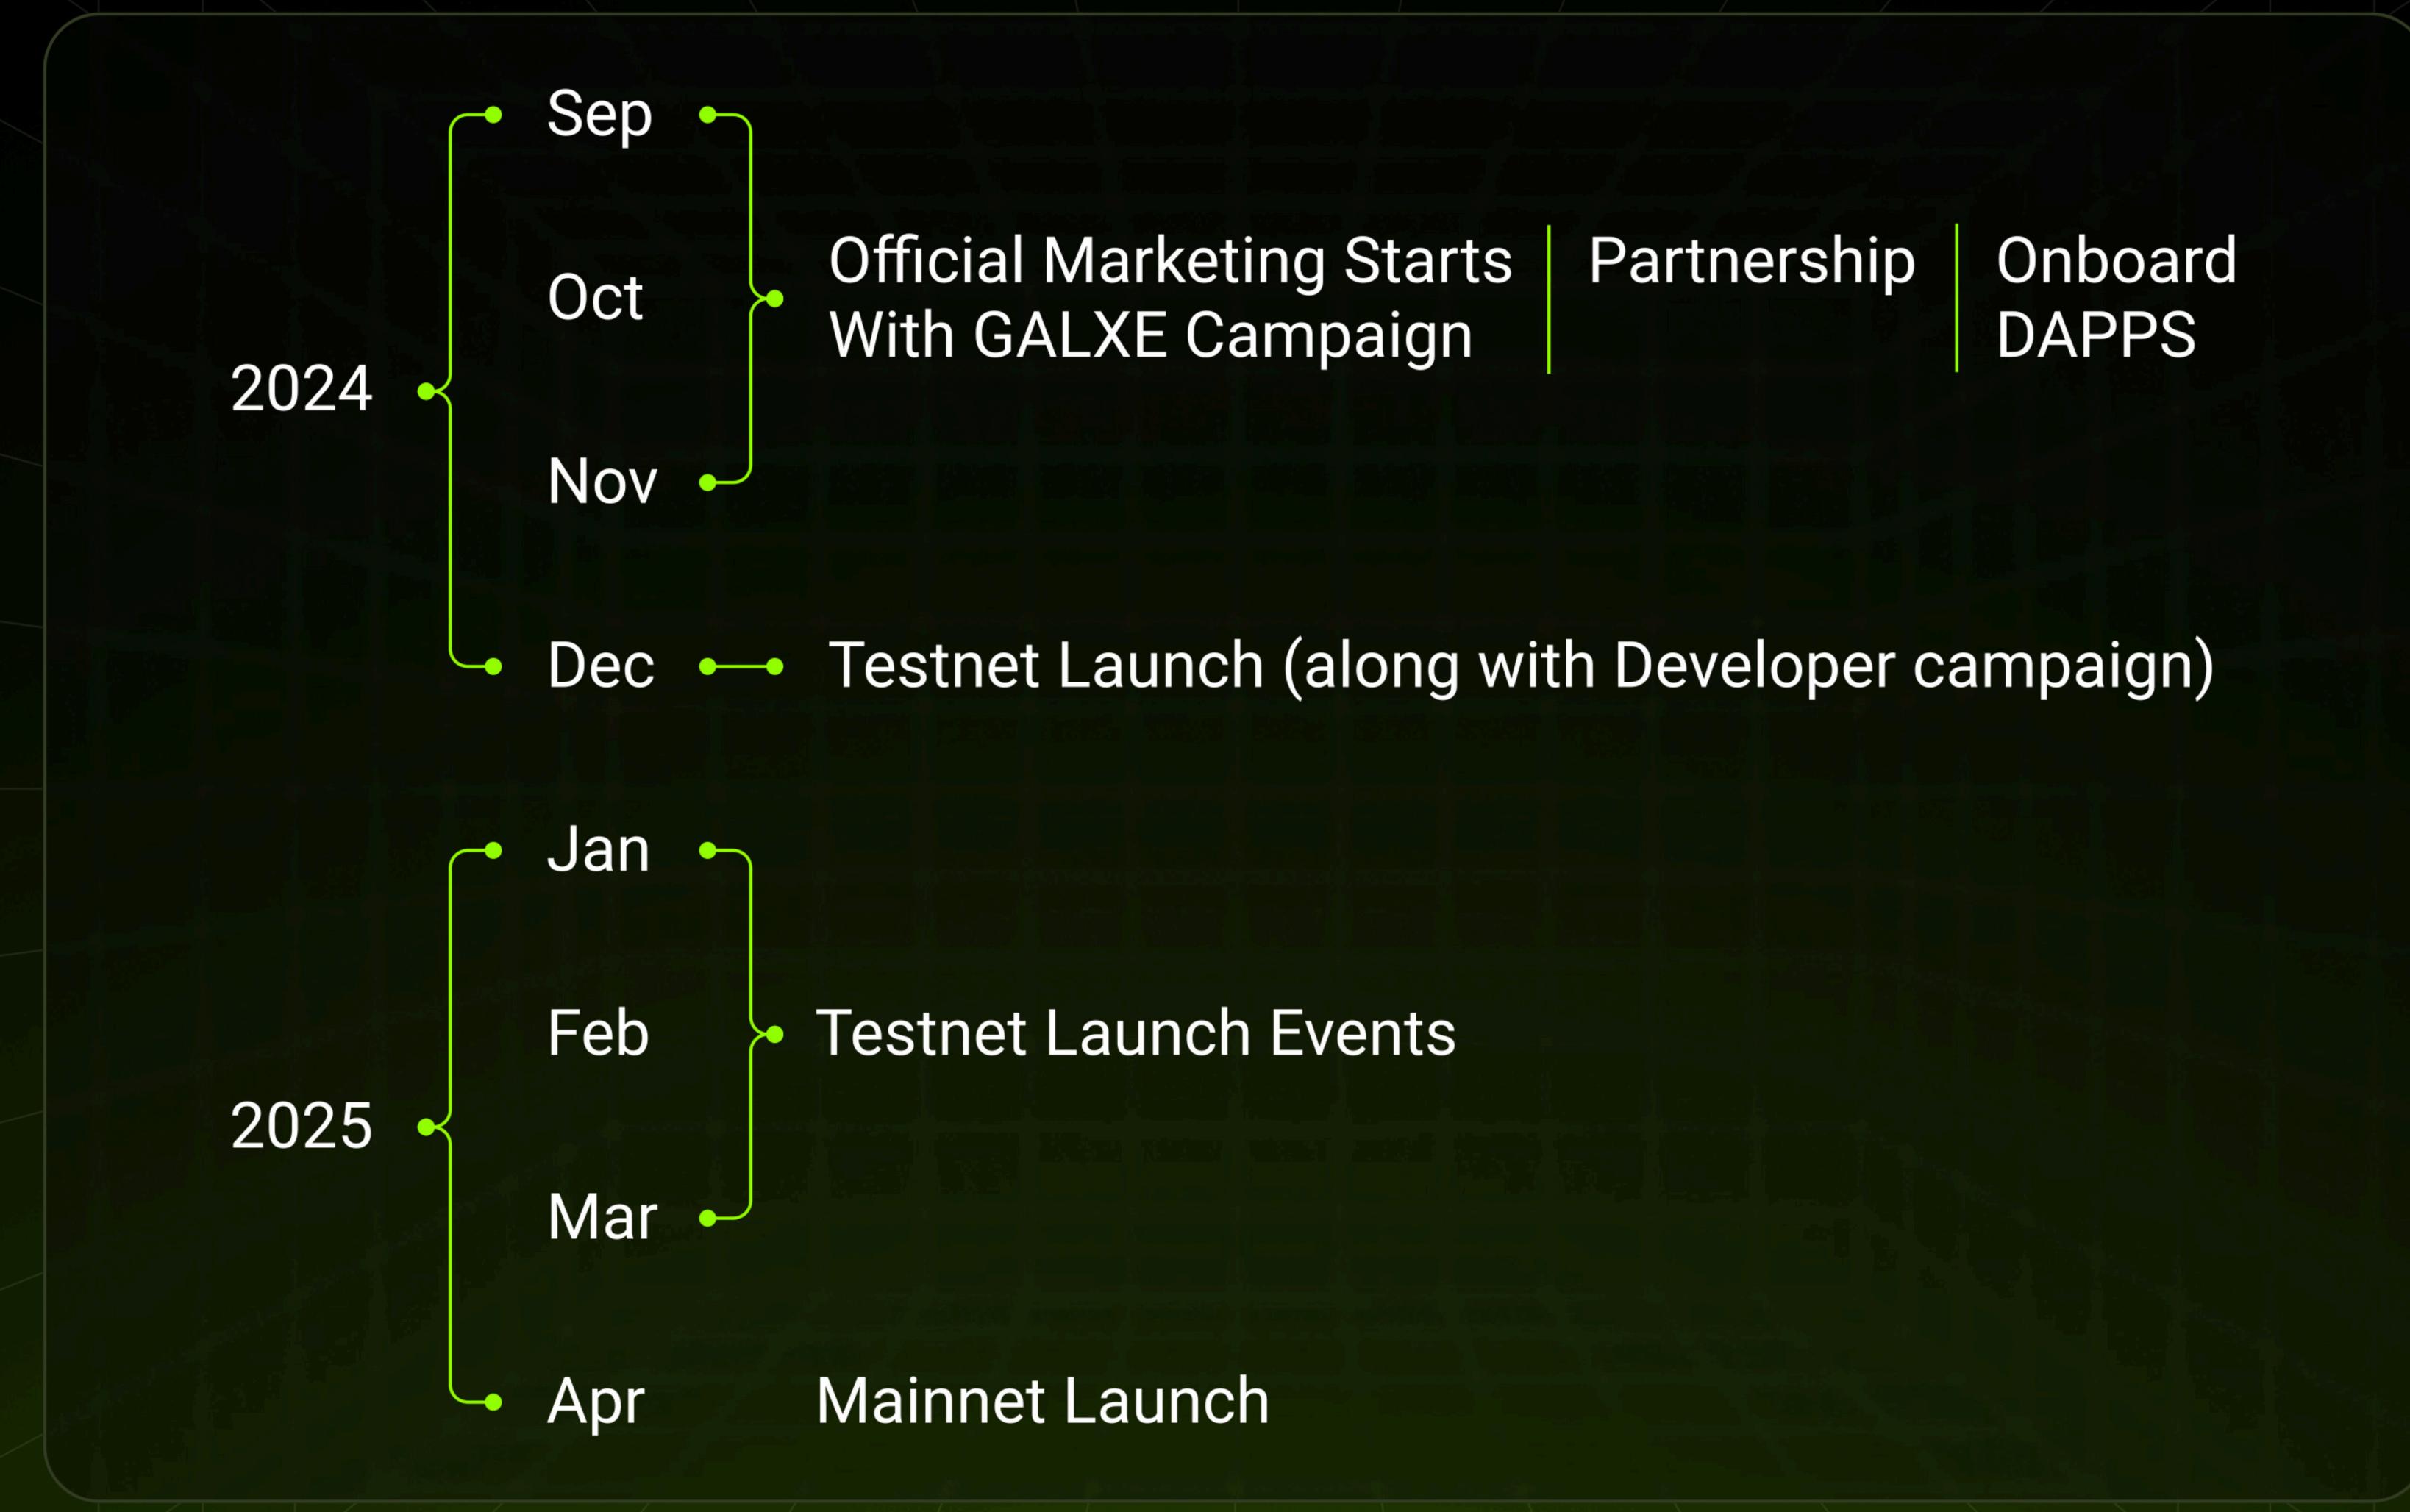

stable

Our focus is to maximize the utilization of available resources while ensuring stability for decentralized applications (DApps) and providing a reliable store of value for protocols.

Thank you
